These Trade Profiles combine information on trade flows and trade policy measures of Members, Observers and other selected economies. The information is retrieved from various WTO Divisions and external sources and presented in standardized format for quick reference.

The indicators are divided into five categories:

- I. Basic economic indicators – population, GDP, current account balance, etc.
- II. Trade policy indicators – specific WTO relevant information, including tariff binding information, import duties collected in total tax revenue, the number of dispute rulings (complainant, defendant), notifications outstanding and contingency measures in force.
- III. Merchandise trade indicators (customs-based statistics) – information on total trade flows broken down by broad product categories and major origins and destinations.
- IV. Commercial services indicators (balance of payments based statistics) – trends in total trade flows and a breakdown by major components.
- V. Industrial property indicators – annual number of patents granted and marks registered in the name of residents and non-residents in the economy.

Data are currently provided for as many Members and Observers for which adequate information is available in the WTO Secretariat and other national and international bodies. For updates, see the WTO Online Database at the WTO Statistics Gateway (www.wto.org, choose Resources, Trade statistics). Depending on data availability, missing trade profiles will be completed or added.

For sources and methodology, please refer to the Technical Notes at the end of the publication.

The definition of economies in this booklet does not imply an expression of opinion by the Secretariat concerning the status of any country or territory, the delimitation of its frontiers, nor regarding the rights and obligations of any WTO Member in respect of WTO Agreements. Throughout this report, the Bolivarian Republic of Venezuela, the Republic of Korea and the Separate Customs Territory of Taiwan, Penghu, Kinmen and Matsu are referenced as Bolivarian Rep. of Venezuela, Korea, Republic of and Taipei, Chinese respectively.

Acknowledgements are due to the International Monetary Fund, the Organisation for Economic Cooperation and Development, the Statistical Office of the European Communities, United Nations Conference on Trade and Development, the United Nations Statistics Division, the World Bank and the World Intellectual Property Organization. The assistance of all these organizations in supplying statistics as well as other information has greatly facilitated the work of the Secretariat.

a Breakdowns by commodity group refer to 2002. Breakdowns by services items refer to 1998.

BASIC INDICATORS

Trade per capita is estimated as a country's total trade of goods and services (exports + imports, balance of payments basis) divided by the population. It is calculated on the basis of data for the three latest years available.

Trade to GDP ratio is estimated as a country's total trade of goods and services (exports + imports, balance of payments basis) divided by GDP. It is calculated on the basis of data for the three latest years available. GDP is measured in nominal terms and with market exchange rates.

Real GDP, exports and imports of goods and services (national accounts based), refer to data at constant prices or volume figures based on 1995.

Ranks in world trade of merchandise and commercial services are defined first referring to European Union (EU (25)) members as individual traders and second referring to the EU (25) as one trader (i.e. excluding individual EU (25) members).

TRADE POLICY

The **Trade Policy Review** date indicates the date of the latest policy review for the country considered.

The **tariff binding coverage** corresponds to the number of the Harmonized System (HS) subheadings containing at least one bound tariff line divided by the respective total number of HS subheadings of the corresponding version of the HS nomenclature. The year shown refers to the latest final year of implementation.

For **MFN bound tariffs**, the simple average of *ad-valorem* (AV) duties refers to the simple average of AV final bound HS 6-digit duties. For MFN applied tariffs it refers to the simple average of *ad-valorem* MFN applied HS 6-digit duties, taking into account AV equivalents if submitted for WTO's Integrated Database (IDB). X indicates that for the respective category more than 40 per cent of HS 6-digit subheadings contain at least one non-ad valorem duty.

The **non AV duties as a percentage of total tariff lines** refer to the number of HS subheadings having at least one non AV duty without AV equivalent, divided by the respective total number of HS subheadings. Duties not provided are treated as non AV.

Agricultural goods according to the AOA (WTO Agreement on Agriculture) definition refer to HS chapters 1 to 24 (excluding fish and fish products) and a number of manufactured agricultural products (for further information see "The Legal Texts, The Results of the Uruguay Round of Multilateral Negotiations", WTO). This definition does not correspond to the definition of agricultural products presented in the breakdown of merchandise trade by main commodity group (see below).

Import duties collected in total tax revenue and **import duties collected to total merchandise imports** are estimated in general on the basis of data for the three latest years available.

The **number of GATS services sectors with commitments** has been established by the WTO Secretariat on the basis of available information and in the light of the Services Sectoral Classification List (MTN.GNS/W/120). The total number of sub-sectors is in the order of 160. In the absence of a GATS schedule for the EU (25), the total number of services sub-sectors listed in the statistical profiles of the individual EC-12 members (i.e. EU (25) members except Austria, Finland, Sweden and EU new member states) and of the EU (25) is that of the existing EC schedule.

For EU (25) members the **number of dispute rulings** refers to the European Communities (EC) figure which also includes rulings concerning EU (15) which were established prior to 1 May 2004.

For EU (25) members the **number of notifications outstanding** (NO) refers to the sum of NO of the EC and of the individual country.

The **number of safeguard measures in force** is based on information made available to the Committee on Safeguards (document G/L703, Annex 3). Please note that there is no obligation on WTO Members to notify the expiry or termination of safeguard measures.

MERCHANDISE TRADE (customs-based statistics)

The share in world total exports and imports of merchandise for individual countries is calculated using world trade including intra-EU (25) trade. For the EU (25) as one trading reporter the share is calculated on the basis of world trade excluding intra-EU (25) trade.

Breakdown by main commodity group according to the ITS (WTO International Trade Statistics) definitions: Agricultural products refer to food (SITC Rev. 3 sections 0, 1, 4 and division 22) and raw materials (SITC Rev. 3 divisions 21, 23, 24, 25 and 26). It differs from the Agricultural goods AOA definition (see above). Fuels and mining products include ores and other minerals; fuels and non-ferrous metals. Manufactures refer to iron and steel, chemicals, other semi-manufactures, machinery and transport equipment, textiles, clothing and other consumer goods. Please note that due to the products not classified in the three main product groups, the sum of shares may not add up to a 100.

Breakdown by main destination and main origin: EU (25) members are grouped as one trading partner. The shares for unspecified destinations and origins are presented when at least one of the shares is greater than the share of the fifth main destination or origin.

COMMERCIAL SERVICES (balance of payments based statistics)

The share in world total exports and imports of commercial services for individual countries is calculated using world trade including intra-EU (25) trade. For the EU (25) as one trading reporter the share is calculated on the basis of world trade excluding intra-EU (25) trade.

Breakdown by principal services items: Other commercial services refer to communication, construction, insurance, financial, computer, information, other business, and cultural and recreational services, and royalties and license fees.

INDUSTRIAL PROPERTY

Data refer to the annual number of patents granted to and marks registrations effected in the name of residents and non-residents of the considered economy.

EU (25) refers to the EU members as of May 2004, including EU (15) members (Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain, Sweden and United Kingdom) and the 10 new member states (Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovak Republic and Slovenia).
