Trade Profiles 2015

Trade flows and trade policy measures

About the WTO

The World Trade Organization deals with the global rules of trade between nations. Its main function is to ensure that trade flows as smoothly, predictably and freely as possible.

About this publication

Trade Profiles combine information on trade flows and trade policy measures of members, observers and other selected economies. The information is retrieved from various WTO Divisions and external sources and presented in standardized format for quick reference.

For more information

The statistical tables included in this report can be downloaded from the WTO web site at www.wto.org/statistics

Introduction

These Trade Profiles combine information on trade flows and trade policy measures of WTO members, observers and other selected economies.

The information is retrieved from various WTO Divisions and external sources and presented in standardized format for quick reference.

The indicators are divided into five categories:

- I. Basic economic indicators – population, GDP, current account balance, etc.
- II. Trade policy indicators – specific WTO relevant information, including tariff binding information, import duties collected in total tax revenue, the number of dispute rulings (complainant, defendant), notifications outstanding and contingency measures in force.
- III. Merchandise trade indicators (customs-based statistics) – information on total trade flows broken down by broad product categories and major origins and destinations.
- IV. Commercial services indicators (balance of payments based statistics) – trends in total trade flows and a breakdown by major components.
- V. Industrial property indicators – annual number of patents granted and marks registered in the name of residents and non-residents in the economy.

Data are currently provided for as many members and observers for which adequate information is available in the WTO Secretariat and other national and international bodies.

For updates, see the Statistics Database at www.wto.org/statistics

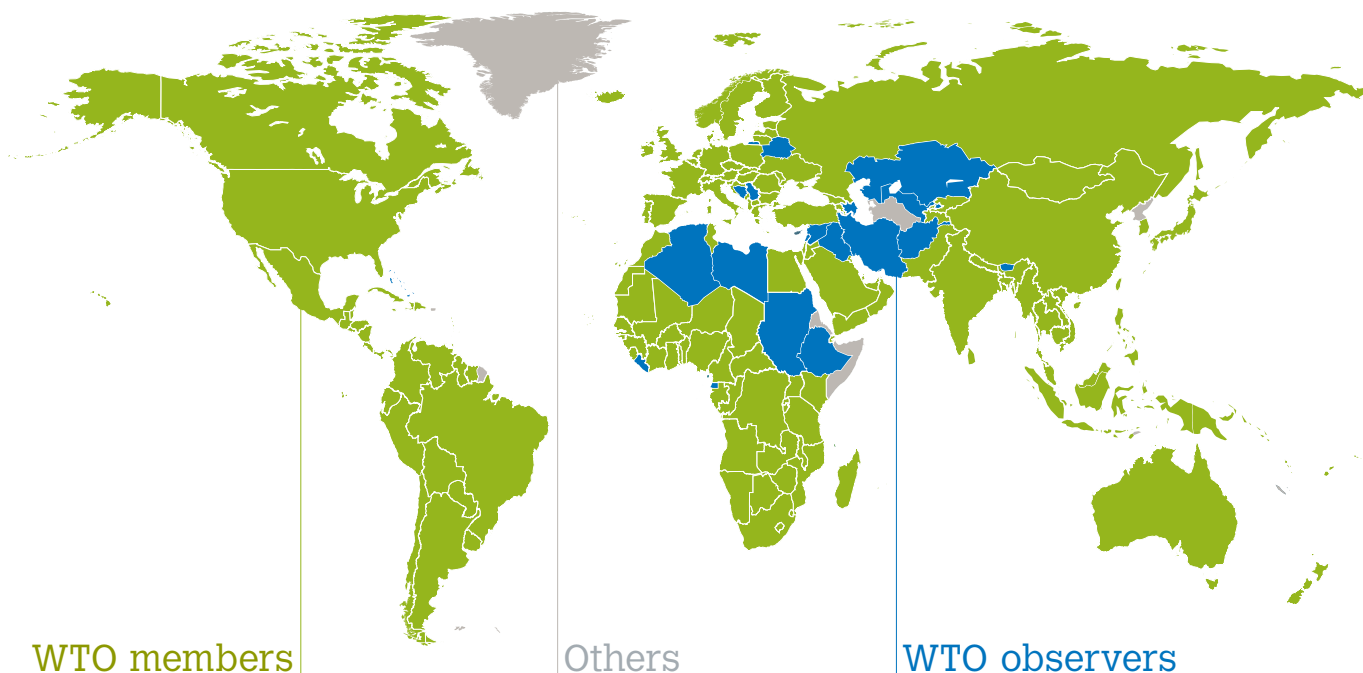

For sources and methodology, see the Technical Notes on page 4.

The definition of economies in this booklet does not imply an expression of opinion by the WTO Secretariat concerning the status of any country or territory, the delimitation of its frontiers, nor regarding the rights and obligations of any WTO member in respect of WTO Agreements.

Throughout this report, the Bolivarian Republic of Venezuela, the Republic of Korea and the Separate Customs Territory of Taiwan, Penghu, Kinmen and Matsu are referenced as Venezuela, Bolivarian Rep. of, Korea, Republic of and Chinese Taipei respectively.

WTO members and observers

WTO members (as of 26 April 2015)

Albania	Cuba	India	Mozambique	Slovenia
Angola	Cyprus	Indonesia	Myanmar	Solomon Islands
Antigua and Barbuda	Czech Republic	Ireland	Namibia	South Africa

Technical notes

General note

Annual average percentage changes are calculated using a geometric average.

Minor discrepancies between constituent figures and totals are due to rounding.

Tables include in general information for the period 2010 - latest available year.

Unless otherwise indicated, (i) all value figures are expressed in U.S. dollars; (ii) trade figures include the intra-trade of free trade areas, customs unions, geographical and other groups; (iii) merchandise trade figures are on a customs basis and (iv) merchandise exports are f.o.b. and merchandise imports are c.i.f. Data for the latest year are provisional.

The statistical data in this publication are supplied by and under the responsibility of the relevant statistical authorities. The use of such data by the WTO is without prejudice to the status of or sovereignty over any territory, or to the delimitation of international frontiers and boundaries.

Comments and enquiries on this booklet should be addressed to statistics@wto.org

Closing date 18 September 2015.

Basic indicators

Trade per capita is estimated as an economy's total trade of goods and commercial services (exports + imports, balance of payments basis) divided by the population. It is calculated on the basis of data for the three latest years available.

Trade to GDP ratio is estimated as an economy's total trade of goods and commercial services (exports + imports, balance of payments basis) divided by GDP, on the basis of data for the three latest years available. GDP is measured in nominal terms and with market exchange rates.

Real GDP, exports and imports of goods and services (national accounts based), refer to data at constant prices or volume figures based on 2010.

Ranks in world trade of merchandise and commercial services are defined first referring to European Union (EU (28)) members as individual traders and second referring to the EU (28) as one trader (i.e. excluding individual EU (28) members).

Trade policy

The **Trade Policy Review** date indicates the date of the latest policy review for the economy considered.

For the **Agreement on Government Procurement** (GPA) accession date: it refers to the date on which the GPA came into force for the relevant Member either as an initial signatory or as a result of subsequent accession. The Agreement has been amended recently and the revised version has come into force for those GPA Parties which have accepted it. Details are available at: https://www.wto.org/english/tratop_e/gproc_e/gproc_e.htm.

For those Parties that have not yet completed their domestic ratification procedures, the GPA 1994 still applies to them.

The **tariff binding coverage** corresponds to the number of the Harmonized System (HS) subheadings containing at least one bound tariff line divided by the respective total number of HS subheadings of the corresponding version of the HS nomenclature.

For **MFN bound tariffs**, the simple average of import duties refers to the simple average of *ad-valorem* (AV) and calculable *ad-valorem* equivalent (AVE) of final bound HS six-digit duties. For MFN applied tariffs it refers to the simple average of AV and calculable AVE of MFN applied HS six-digit duties.

The **non-AV duties as a percentage of total tariff lines** refer to the share of HS six-digit subheadings subject to non-AV duties. When only part of the HS six-digit subheading is subject to non-AV duties the percentage share of these tariff lines is used.

Agricultural goods according to the AOA (WTO Agreement on Agriculture) definition refer to HS chapters 1 to 24 (excluding fish and fish products) and a number of manufactured agricultural products (for further information see "The Legal Texts, The Results of the Uruguay Round of Multilateral Negotiations", WTO). This definition does not correspond to the definition of agricultural products presented in the breakdown of merchandise trade by main commodity group (see below).

Import duties collected in total tax revenue and import duties collected to total imports (goods and commercial services) are estimated in general on the basis of data for the three latest years available.

The **number of services sectors with GATS commitments** has been established by the WTO Secretariat on the basis of available information and in the light of the Services Sectoral Classification List (MTN.GNS/W/120). The total number of sub-sectors is in the order of 160. In the absence of a GATS schedule for the EU (28), the total number of services sub-sectors listed in the statistical profiles of the individual EC-12 members and of the EU (28) is that of the existing European Communities (EC) schedule.

For EU (28) members the number of **notifications outstanding** (NO) refers to the sum of NO of the EU and of the individual economy.

For the **number of contingency measures in force**, data are sourced from the I-TIP application. Antidumping and countervailing measures are taken

from semi-annual reports notified (last report included: June 2015). Information on safeguards has been taken from the safeguards database. Please note that there is no obligation on WTO members to notify the expiry or termination of safeguard measures.

For the **number of disputes**, a dispute is understood to be a proceeding initiated under the Understanding on Rules and Procedures Governing the Settlement of Disputes (DSU) and identified by a reference number (WT/DS...). Reports refer to those adopted by the WTO Dispute Settlement Body (DSB). For EU (28) individual members the numbers refer to the EU figures plus any additional disputes involving only the member considered. For more information refer to www.wto.org/disputes.

Merchandise trade (customs-based statistics)

The **share in world total exports and imports of merchandise** for individual economies is calculated using world trade including intra-EU (28) trade. For the EU (28) as one trading reporter the share is calculated on the basis of world trade excluding intra-EU (28) trade.

Breakdown by main commodity group according to the ITS (WTO International Trade Statistics) definitions: **Agricultural products** refer to food (SITC Rev. 3 sections 0, 1, 4 and division 22) and raw materials (SITC Rev. 3 divisions 21, 23, 24, 25 and 26). It differs from the Agricultural goods AOA definition (see above). **Fuels and mining products** include ores and other minerals; fuels and non-ferrous metals. **Manufactures** refer to iron and steel, chemicals, other semi-manufactures, machinery and transport equipment, textiles, clothing and other consumer goods. Please note that due to the products not classified in the three main product groups, the sum of shares may not add up to 100.

Breakdown by main destination and origin: EU (28) members are grouped as one trading partner. Shares for unspecified destinations/origins are presented when at least one of the shares is greater than the share of the

fifth main destination/origin. Re-imports are also included.

Commercial services (balance of payments based statistics)

The **share in world total exports and imports of commercial services** for individual economies is calculated using world trade including intra-EU (28) trade. For the EU (28) as one trading reporter the share is calculated on the basis of world trade excluding intra-EU (28) trade.

Breakdown by principal services items: Other commercial services refer to construction, insurance, financial, telecommunications, computer, information, other business, and personal, cultural and recreational services, as well as charges for the use of intellectual property n.i.e.

Industrial property

Data refer to the annual number of patents granted to (including those based on PCT international applications) and trademark registrations effected (including designations under the Madrid Agreement or Protocol) in the name of residents and non-residents of the considered economy.

Statistical sources:

Eurostat, online database; IMF, **Balance of Payments Statistics** and **Government Finance Statistics**; UNCTAD, **TRAINS** database; UNSD, **Comtrade database** (for OECD members, UNSD-OECD Joint Trade Data Collection and Processing System); World Bank, **World Development Indicators**; WIPO, **Industrial Property Statistics**; WTO and national statistics.

EU (28) refers to the EU members as of July 2013, including EC-12 (Belgium, Denmark, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain and United Kingdom) and Austria, Bulgaria, Croatia, Cyprus, Czech Republic, Estonia, Finland, Hungary, Latvia, Lithuania, Malta, Poland, Romania, Slovak Republic, Slovenia and Sweden. The Separate Customs Territory of Taiwan, Penghu, Kinmen and Matsu is referred to as Chinese Taipei in the tables.

If you would like more information on the contents of this report or if you have any comments or suggestions for improvement please contact the International Trade Statistics Section (statistics@wto.org; www.wto.org/statistics).

Trade Profiles 2015 provides the latest information on the trade flows and trade policy measures of WTO members, observers and other selected economies. With information for each economy provided in a standardized format, the publication is an invaluable quick reference tool for anyone looking for essential trade statistics. The data provided for each economy include basic economic indicators (such as GDP), trade policy indicators (such as tariffs, import duties, number of disputes, notifications outstanding and contingency measures in force), merchandise trade flows (broken down by broad product categories and major origins and destinations), services trade flows (with a breakdown by major components) and industrial property indicators. With one page devoted to each economy, Trade Profiles offers a concise overview of global trade.
